SimpleHelp Crack + Free Registration Code [Win/Mac]

SimpleHelp is a remote support utility which connects with your customers' computers and allows you to see what they see, take control of their computer remotely, set up the computer and share information with them. SimpleHelp consists of two parts: an application that is installed on your customer's computer, and an online service that your customers need to access in order to use the application. The online service is based on the HTML5 platform which allows for the most successful and flexible presentation of content. SimpleHelp is installed as a stand-alone application on your customer's computer. Its functionality is limited to connecting with remote computers to retrieve information and take control of their operations. SimpleHelp is free to use! More information: 0 2019/02/12 22:12 Remote Desktop Manager (RDM) is a Remote Desktop Services (RDS) application that is used to remotely connect to another computer or server without having to be physically present at that computer. RDM also allows a number of different configuration items to be set on the remote computer including the sound, mouse, graphics card, network settings etc. More information: 0 2020/04/02 17:17 4 Web Video Recording (4wr) is a cross-platform solution for recording, editing and streaming your videos. It lets you record any web videos you visit on the web, with its built-in OCR technology and the ability to convert any media source to H.264. You can also play your recorded content back on any device. Furthermore, it is built on Firefox, Chrome and Opera support. 0 2020/04/22 11:10 DNS Management Tool (Binoculous) is a flexible domain name server manager, based on an easy to use intuitive interface with intuitive, drag and drop functionality. It is a powerful tool to view and edit all zone information, as well as the entire hierarchy and structure of zone files. DNS Management Tool uses a plug and play environment, so both servers with static and dynamic zone information can be used with the same tool. 0 2020/04/23 02:04 Java Networking Bridge (JNB) is a lightweight

What's New in the SimpleHelp?
