Category: Reader, A Guide to the Software Package. An on-screen keyboard is a software application that uses a graphical layout that is displayed on screen. If you need a Bangla keyboard, you can use On Screen Bangla Keyboard, which is a Bangla on-screen keyboard that features a user-friendly layout, as it comes with some of the most important keys that can be found on a standard keyboard, such as the Backspace key and the Enter key. Note: during

installation, you need to provide the application with a serial number that you can retrieve by clicking the corresponding button on the installer's interface when prompted to do so.
