Using your new media player to watch videos. We should be looking at over the top (OTT) content. This is OTT video to you.

This is a great example of a streaming video platform that allows viewers to create their own content, curate content from many sources, and engage with other users. It is a way for users to produce their own content, maybe something between a news network and a video sharing website such as youtube.

published: 27 Apr 2016 **FIRST OPINION: Windows 10 vs Android** Who will be the winner of the new internet battle between Windows 10 and Android? As of the end of 2016, Windows 10 has over 1 billion users, and that's doubled in size in the last year.

Android on the other hand has been struggling to get traction. It's the most used OS in China and India but its still only used by about 1 in 10 people. So when can we expect to see an Android monopoly? Android and Chrome OS are almost like a mesh of users. On the internet that's seen as almost equal. On the desktop, Chrome OS and Windows 10 are both still considered by many to be too little too late. The question is who will win out of Android and Chrome? Make sure you subscribe to us now for more amazing videos that you cannot miss! published: 24 Sep 2017 10 Best Free

Video Editor Software for Windows 2017 Hey everyone! This is my first uploaded video. It is my list

Take care of your system and keep it safe from hackers with ZoneAlarm Free Firewall. The free version of ZoneAlarm is designed to provide basic security to your PC. You can keep your device safe from viruses, hackers and other bad things by using the ZoneAlarm Pro version, but there's a catch: You need to register to get it. The good news is that the free version has all the same features and functionality as the pro one. ZoneAlarm Free Firewall is a free version of ZoneAlarm for Windows. ZoneAlarm is the most popular personal firewall for the Windows platform, developed by the same team who created ZoneAlarm Pro. If you're looking for a free alternative to the ZoneAlarm Pro firewall, you've come to the right place. Features: -Provides basic system protection, such as virus and spyware detection. -Stops unwanted applications from accessing your personal information. -Allows you to control how applications use the network and manage access to the Internet. -Provides complete system security. -Schedules application control to prevent the activity of dangerous

applications. -Prevents access to sensitive information and files and prevents unauthorized access to your system. -Blocks public servers and prevents other people from connecting to your network. -Replaces the Firewall with a modern graphical user interface. -Optimizes Internet access. -Removes all the system changes and updates. -Allows you to choose from a variety of settings, including sound notifications. -Prevents access to prohibited applications, such as games and e-mail readers. -Disables wireless cards, without affecting wired networks. -Controls private servers with password protection. -Allows you to quickly connect to your favorite networks. -Automatically learns and adapts to the way you use the PC. -Assigns a custom home page to your network. -Blocks web sites and applications that are not safe. -Protects your privacy by preventing software companies from collecting your personal information. -Provides the best defense against threats, such as viruses, Trojans, spyware, malware, hijackers, scams and other malicious software. -Block all the available ports on your system to prevent unauthorized access. -Block web sites and applications that are not safe. -Anti-phishing protects against phishing, a form of

email fraud that uses Web sites to steal your personal information. -Prev
